PROFESSIONAL SUMMARY

Java Full Stack Developer with 4+ years of experience building end-to-end applications using Java, Spring Boot, Hibernate, PostgreSQL, and React.js. Skilled in designing RESTful APIs, implementing JWT-based authentication, and delivering responsive, production-ready frontends integrated with secure backend services. Experienced with containerized deployments using Docker and Kubernetes, and currently building full-stack platforms leveraging technologies like Tailwind CSS, Kafka, and WebSockets. Strong foundation in clean architecture, API design, and Agile delivery.

TECHNICAL SKILLS

Languages:	Java 8/11/17, JavaScript (ES6+), SQL
Core Java:	OOP, Collections, Multithreading & Concurrency, Streams, Data Structures & Algorithms
Backend & APIs:	Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, RESTful APIs, Microservices, Apache Kafka, WebSockets
Frontend:	React.js, React Hooks, Tailwind CSS, HTML5, CSS3, Axios
Databases:	PostgreSQL, MySQL, MongoDB, Redis, pgAdmin, Data Modeling
DevOps & Cloud:	Docker, Docker Compose, Kubernetes, AWS (S3, EC2, RDS), Git, GitHub Actions

WORK EXPERIENCE

Software Engineer, Java Backend Developer — CMS Computers India Pvt Ltd., Bengaluru

- Designed, developed, and maintained 20+ RESTful APIs using Java, Spring Boot, May 2023 – Present Hibernate, and PostgreSQL across 5+ enterprise business modules supporting core internal operations.
- Developed and enhanced 15+ React.js components, integrated REST APIs using Axios, and implemented frontend validations, improving data entry accuracy.
- Built secure authentication and authorization layers using Spring Security, JWT, and Role-Based Access Control (RBAC), securing access for 100+ internal users.
- Optimized PostgreSQL queries and indexing strategies, reducing average API response time by an estimated 20-25% and improving overall backend performance.
- Containerized applications using Docker and Docker Compose, reducing new environment setup time for developers by an estimated 40%.

Java Full Stack Software Engineering — Postgraduate Program — StackRoute (NIIT)

- Completed a full-time, intensive industry-oriented program covering Java 8+, Spring Boot, June 2022 – May 2023 Hibernate, REST APIs, Microservices, React.js, and enterprise database management.
- Built and deployed multiple capstone projects applying Spring Boot, Hibernate, PostgreSQL, and React.js in simulated enterprise scenarios, successfully bridging into a full-time engineering role.

Junior Java Developer — OneIT Custom Business Software, Remote

May 2021 – May 2022

- Built and maintained 10+ backend APIs using Java, Spring Boot, Spring MVC, and Hibernate for enterprise web applications.
- Implemented business logic, validation, and exception handling following layered architecture, reducing recurring bug reports by an estimated 20%.

- Designed entity relationships and performed database operations using Hibernate/JPA with MySQL/PostgreSQL.

KEY PROJECTS

DevPulse — Developer Task & Notification Platform

Java 17, Spring Boot 3, PostgreSQL, Redis, Kafka, WebSockets, React.js, Tailwind CSS, Docker

- Building a full-stack developer productivity platform with real-time notifications via WebSockets and asynchronous event processing using Apache Kafka.
- Implementing JWT-based authentication, Redis caching, and CI/CD pipelines via GitHub Actions.

Rock Paper Scissors — Full Stack Web Application

Spring Boot, React.js, PostgreSQL, pgAdmin, REST APIs

- Engineered a full-stack interactive application utilizing a Spring Boot backend and React.js frontend, managing game state and user data within a PostgreSQL database managed via pgAdmin.

ADVANN — E-commerce Microservices Backend

Spring Boot, Spring Cloud Gateway, Eureka, Hibernate, PostgreSQL, JWT, Docker

- Architected a microservices backend spanning 5+ services, with centralized API Gateway and Eureka Service Discovery for dynamic routing.

EDUCATION

B.Tech, Computer Science & Engineering — Amity University, Kolkata

2016 – 2020
